The beef sector is leading all facets of agriculture. Record prices are being paid at the auction markets on all classes of cattle. To everyone who stayed in – congratulations. You have a very bright and exciting future in our chosen industry. The supply of beef cattle is at a low, not seen in decades, and the demand is ever increasing throughout the world with rising populations.

We have new breeders in this year's sale which will add some new genetics along with our mainstay breeders that are renowned for selling their best at the "All Star Classic" Sale. It is always important to add top quality seed-stock into your herd. Increasing your investment will be a real asset in today's cattle market. We have a herdsire prospect, bred heifers, calendar year heifer calves, semen lots and transplant genetics that will help you shape the future of the breed.

If you have any questions please contact any of the consignors, the Sale Chairman - Kirk Seaborn or myself. If you are interested in adding these great genetics into your herd but are unable to attend the sale please contact any of the sale staff, livestock representatives or Don Savage Auctions and your order will be handled in a professional manner.

Yours truly,
 Don Savage

EPDs (US): CED: 9 BW: 2.6 WW: 51 YW: 67 Milk: 22 MW: 47 CEM: 4

Consignor: KC Stock Farm Ltd. - Sangudo, AB

Red Mercury is a 100% Shorthorn Herd Bull. He is sired by the 1997 Denver Stock Show Bull Calf Champion GFS Creole 9590. His dam, Braebank Dew Winnie 1W, is an own daughter of the JSF Iron Range 13S and a never miss foundation female we purchased from Braebank Shorthorns.

Red Mercury is a long bodied, smooth made bull. He possesses a good black foot, with nice bone and clean joints. Red Mercury should work well on both heifers or cows and leave some great cherry red replacements. Calving ease and balanced EPDs. KC is retaining 100 straws of in-herd use semen.

Terms Announced Sale Day.

Consignor: Paintearth Shorthorns - Castor, AB

This fabulous heifer is the pick of the pen. Sindy 74B is a Saskvalley Primo daughter out of Paintearth Sindy 43R. The Sindy family is very fertile and long lived. Paintearth's original Sindy is 15 and still producing. A never miss line.

Bred: to Paintearth Jimmy 80Z - a very easy calving bull. Jimmy is sired by Saskvalley Wholesome 114W. Observed bred on May 2. Preg checked on July 30 and safe to that date.

Also offering 3 embryos as Lot 3. Full siblings to this heifer.

P/E: April 25 to August 21, 2015 to Diamond Lord Belmore 56B

36B is a good bred heifer by Herbourne B Manitoba Gus 13Z and out of a top producing Newbiggon Jumbo daughter. We have a full sister so are able to part with this good heifer. Her maternal sister sold to Hatfield Shorthorns in last year's Agribition Sale. The calf by Lord Belmore will combine some interesting Australian genetics.

Consignor: Circle M Shorthorns – Aldergrove, BC

P/E: April 1 to August 11, 2015 to Circle M Beaumont 6B

This red bred yearling is from a New Beginnings Jumanji daughter, Prairie Pride Crackle. She is bred to Circle M Beaumont 6B, a son of De Campis Zorro, and is confirmed bred for a March calf. We were asked to put only our best in the sale and we said OK. This cow family has worked so well for us for years, longevity being a valuable characteristic, and we retain several of the family in our herd. She is easy fleshing, straight topped, and all of the females in her family have great udders. She is halter broke, has a good temperament and would be a wise addition to any herd.

Consignor: Circle M Shorthorns – Aldergrove, BC

P/E: April 1 to August 11, 2015 to Circle M Beaumont 6B

Butterfinger, a roan bred yearling heifer, is from the JJ Genetics Candy cow family. It was a difficult decision to enter her in the sale as she is one of our best, but we still have a number of the family in our herd. She is bred to Circle M Beaumont 6B, a son of De Campis Zorro, and is confirmed bred for a March calf. She is thick, deep bodied, and easy fleshing. She has a sweet temperament, is halter broke, and is very easy to be around. The Candy family has produced many winners in the show ring over the years, such as Circle M Ghost rider, Circle M Sugar Plum, ACC Candy's Winegum, and these winners have gone on to produce many great calves for many years. This cow family is noted for their longevity, easy fleshing, and good udders. We know she will be a valuable asset in any herd.

4 GRADE I EMBRYOS

Consignor: Horseshoe Creek Farms Ltd. - Weyburn, SK

We are offering the first sets of embryos from HC Bluebook 22B, who topped the 2015 Sun Country sale at \$32,000. We feel he is one of the very best bulls we have ever produced and one of the things that excites us, is that he continues to get better and better with age.

The donor dam of these embryos is one of our new donors, HC Sparkle Delight 77W. In 2009, we offered her dam in the Fever Sale and she topped that sale at \$6000 to Cyclone Trace in Iowa. We retained 77W and we are certainly glad we did as she has developed into one of our very best females. She is apple smooth and possesses the easy fleshing trait that the Sparkle line pass on from generation to generation. 77W is our favorite daughter of Star P Matrix 4N in our herd.

We will guarantee the buyer will get a minimum of two pregnancies at 70 days provided an experienced embryo technician is used. These embryos are exportable to many countries. The resulting calves will be 100% in the CSA Closed herd book.

This is a very unique opportunity to obtain Bluebook progeny from the best daughter of Weebollabolla Theodore T85 that we have seen. Melita Rose 7048 is extremely easy fleshing, and looks the same year in and year out. She is one of the first cows that visitors ask about. She has a beautiful udder and milks well. She is the type most everyone wants to build their cowherd around as she is fertile, sound, trouble free and extremely attractive. Mating her with Bluebook should result in some outstanding progeny! We will guarantee a minimum of two pregnancies at 70 days provided an experienced embryo technician is used. These embryos are also exportable to many countries. Resulting calves will be 100% in the CSA closed herd book.

Stockman just finished up his third breeding season here. Without a doubt, this sire is the most prolific and dynamic sire that we've created or used at Crooked Post. He combats the antagonisms of the various breeding traits so very well. It's been said that when making a genetic selection for improvement you should only be concerned about making a significant change in one or two traits at a time, that said Stockman seems to speed this process by being an improvement sire for calving ease, growth, udder, scrotal, foot and skeletal structure, fleshing and carcass qualities, de-horner, temperament, fertility and plain old eye appeal. There's a lot of desirable genetic triggers that can be pulled here, Stockman sends a lot of lead down range!

Thank you to Dr. Mario Damboriarena of Uruguay for recently importing Stockman semen, the third Crooked Post sire to be utilized in the Estancia Santa Maria herd in the last decade. A destination stop of the 2016 World Shorthorn Conference.
