

The graphic features the word "First" in a cursive script at the top left. Below it, the words "ALL STAR" are written in large, bold, serif capital letters. A row of ten five-pointed stars separates "ALL STAR" from the word "CLASSIC", which is also in large, bold, serif capital letters. At the bottom, the words "SHORTHORN SALE" are written in smaller, bold, sans-serif capital letters. The entire text is set against a background of green foliage and a yellow sky.

Lacombe, Alberta, Canada**

Welcome to the Alberta Shorthorn Association's 1st "All Star Classic" Shorthorn Sale. What an awesome sale offering. Kirk Seaborn and Ken Hehr have been busy these past few months selecting the right cattle to fit the mold to be able to offer some of the best Shorthorn genetics in the industry. Cattle for this first sale are coming from across Canada with the best herdsire prospects, bred females, calendar year heifer calves and embryo flushes; an offering that the consignors and the Shorthorn industry can be very proud of. Kirk and Ken have also selected some of the best females from commercial cattlemen to augment an already strong offering proving what Shorthorn genetics can accomplish for their customer base.

Times have changed in the cattle industry and we are all pleased to be a part of this strong market. Cattle numbers are low throughout North America and the cattle being sold on October 22nd will definitely appreciate in value as the beef industry will thrive for many years to come.

If you have any questions please contact any of the consignors, Kirk Seaborn or myself. If you are interested in adding these great genetics into your herd but are unable to attend the sale please contact any of the sale staff, livestock representatives or Don Savage Auctions and your order will be handled in a professional manner.

Yours truly,
Don Savage

SELLING FULL POSSESSION. Semex owns world wide distribution rights to Powerplay 802U. 802U effectively combines maternal strength with powerful performance, structural soundness, muscle, length and style in a free moving package. He has been successfully used the last two years on heifers and cows with excellent results. Powerplay's dam is an excellent young donor cow at Shadybrook Farms and is an ideal type of beef cow. EPDs rank Powerplay in the top two percent for milk; top ten percent for yearling weight and top twenty percent for weaning weight. This bull has a tremendous future ahead of him. Visit www.shadybrook.ca for up-to-date video footage of this young herdsire.

Lot 2 - Paintearth Walter 58W

If you are looking for thickness and length Paintearth Walter has it all. He has been shown since he was a calf. In 2009 he was the Alberta Hi-Points Bull Calf. In 2010 he was the Yearling Champion Bull at Farmfair and was first in his class at Red Deer. Walter 58W has been used at Paintearth Shorthorns for two years and his calves show growth ability and thickness. He is entered in Farmfair to be shown either by the new owner or the Orams.

Consignor: Hespero Bank Shorthorns - Eckville, AB

Pure Power is a very exciting bull calf; something very special from day one. 15Y is a wide topped, heavy muscled, smooth shouldered calf with good feet and legs. He has a very good testicle shape and size. His mother is from the Image cow family that is very sound, good producing and has good udders. 15Y carries the Image line on both sides of his pedigree and is a total outcross bull with a powerful future. He will be entered in Farmfair. Hespero Bank Shorthorns would like to retain in-herd semen rights.

A1 May 20, 2011 to Belmore Jackaroo Z109.

P/E June 3 to July 26, 2011 to Crooked Post Jackaroo 36X.

Crooked Post Lady 2X has been a crowd favourite right from her start. Her dam has produced three other full siblings to Lady 2X including a brother we used here last year named Crooked Post Tamarack 17W, what a set of calves he left us this year, he is now walking the pastures at Cedar Grove Shorthorns in Quebec. Another full brother named Crooked Post Goldmine 2U was sold to Tough Shorthorns in Manitoba, and a full sister is owned by Robertson Livestock in Alberta where they run a large commercial herd and a smaller purebred Shorthorn herd. Crooked Post Lady 2X is possibly the best of this genetic cross, she has a lot of outward turn on her rib cage, is boldly constructed yet has the refined characteristics you would expect from a future herd matron.

P/E June 3 to July 26, 2011 to Crooked Post Jackaroo 36X.

Lassie 7X is a long deep barrelled female that possess good muscle mass and is feminine. Calving ease, growth, and maternal traits are predicted at a high certainty. She indexes at 105 for birth weight and is at the top of the breed for calving ease, birth weight, and growth. There is a limited amount of Belmore Jackaroo Z109 semen available in North America. Letting go of any of his daughters was a hard decision but we have taken the next step and are using an impressive son of his named Crooked Post Jackaroo 36X, look him up on YouTube through www.crookedpost.ca

Hand bred April 26, 2011 to JT Exclusive 65X X.
 P/E June 3 to July 26, 2011 to Crooked Post Jackaroo 36X.
 Crooked Post Jackie 8X indexed 110 for marbling and 108 for ribeye area against her contemporaries. The way these Jackaroo offspring perform from pasture to plate leaves little wonder in my mind as to the success he's achieved in Australia. Jackie 8X is the most impressive Jackaroo daughter that I have evaluated. She is placid natured, full of shape and dimension, free moving and is easy fleshing on her moderate frame size. It has been a few years now that our yearling heifer pen has ultrasound scanned above AAA for marbling - and that is on a basic winter ration of high roughage and next to no grain.

AI May 5, 2011 to Belmore Jackaroo Z109
 P/E June 3 to July 26, 2011 to Crooked Post Jackaroo 36X.
 This powerful bred heifer indexed 111 for weaning weight and 106 for yearling weight and she also ranks at the very top of the Shorthorn population for the major measurable trait predictors. Sired by the homozygous polled bull Grissom and from the young dam Goldie 10T who gave us one of our best heifers in 2009 and in 2010 she repeats with this great heifer Crooked Post Goldie 21X - predictable and reliable. Crooked Post Jackaroo 36X was used heavily at Crooked Post this past breeding season.

AI April 26, 2011 to Crooked Post Grissom 24T
 P/E June 3 to July 26, 2011 to Crooked Post Jackaroo 36X.
 We have been ultrasound scanning for over ten years, all yearling heifers and bulls are scanned. We don't do it because we like paperwork, we do it in order to apply added knowledge to our breeding program and the programs of our customers. Minnie 26X is from one of our great ET daughters created from Crooked Post Minnie Capri 20K and Waukaru Goldmine 2109. Compared against her contemporaries, Minnie 26X indexed 106 for weaning weight and measured high for ribeye area, high marbling score and was moderate backfat measure.

P/E June 3 to July 26, 2011 to Crooked Post Jackaroo 36X.

There is little doubt that one of the most exciting young females in our herd is Crooked Post Hope 8T. It is only with the confidence that we have in this great young female that we agreed to part with her two daughters that were selected for this sale. Hope 8T has a thumper of a Grissom 24T bull calf on her this year, earlier this summer we were processing cattle and a neighbour who runs Char. cross cows was over helping us out, he said, "Now that looks like a potential herdsire!" Hope 38X will have the same broodiness about her as her mother and will have added fleshing ability and volume from Grissom. Crooked Post Jackaroo 36X is available for viewing on www.crookedpost.ca through YouTube.

P/E May 18 to August 10, 2011 to HC Bar Code 16X

If you like moderate framed, easy fleshing females then this heifer will be one you should consider. Our Leroy daughters are becoming superb brood cows that can raise a good calf and maintain their condition while doing it. The dam of this heifer was a consistent producer here and she had a flawless udder with plenty of milk. A maternal sister to 32X won many shows in Ontario a few years ago. She sells bred to HC Bar Code 16X, our junior herdsire who is sired by Pheasant Creek Leader 4th, the Grand Champion bull at the 1970 Regina Bull Sale. Bar Code had a birth weight of 75 lbs and he is exactly what we want to mass produce in our herd.

Sired by the Australian bull Belmore Jackaroo Z109 from Andy Withers, Jackaroo excelled in the Durham Research Project. We have plugged Jackaroo into our program for three years and are very happy with what we've created. Claire 15Y has been a favourite from the beginning, she combines a lot of what is important to us, she is no mistake and to be quite honest she is really not a surprise to us, she is just what we expect from these genetics. Reliable, predictable and profitable- purchase with confidence.

Lot 25 - Crooked Post Claire 15Y

Crooked Post Grissom 24T is currently a trait leader in the 2011 American Shorthorn Association Sire Summary for calving ease, weaning weight, yearling weight, milk, and total maternal traits. He is being used in three continents including the two largest performance recording Shorthorn herds in the world, The Grove and Yamburgan. The Grissom progeny maintain and perform well on basic roughage, his daughters are easy calving, have strong mothering instincts, have tidy udders with plenty of milk, are docile and level headed. Maria 25Y is exceptional and is destined to be a great genetic investment.

The Maria cow family has done well for us. Through the development of this family, functionality and structure has remained true to the Maria name. A few years ago we were fortunate enough to receive a visit from Dr. Ron Bolze and Nick Hammet from the American Shorthorn Association; it was their opinion that Maria with first calf at side was the finest they had seen in some time. She along with her progeny continues to impress. Maria 34Y is possibly the best to date in my opinion.

HC MIST'S RETURN 13R
HC CHERRY MIST 79T X

Consignor: Horseshoe Creek Farms Ltd. - Weyburn, SK

The Alexanders are extremely pleased with their Hillside Leader calves and this is one of his first born here. Hillside Leader was used on our heifers last year, and his calves are a very impressive bunch. Her dam was 21 months old when 19Y was born and she has done an excellent job of raising her without any creep feed. She was born unassisted with a birth weight of 80 lbs. This heifer is moderate framed, super thick and structurally sound in every way. Horseshoe Creek think enough of her, that they have entered her at Agribition, and will show her at no cost to the buyer if the buyer so chooses. This heifer would be an excellent show prospect for a junior, and she will also develop into a front pasture brood cow.

Consignor: Horseshoe Creek Farms Ltd. - Weyburn, SK

Horseshoe Creek have dug deep into their ET heifers to offer this heifer. She is a daughter of Mr Gus 80C who has proven his genetic worth around the world. 80C semen is very scarce now, so this is one of the very few opportunities to purchase a daughter. Her dam was a standout donor first in Rolly Bateman's Braebank herd, and then in the Alexanders, and she has offspring throughout Canada, USA, Britain and South America. There are flush mates to this heifer in the Alvie herd in Scotland and at Cyclone Trace in Iowa. This heifer will only get better with age; she is a very unique investment opportunity!

BAR P LOUISA 33F XF 668768

BAR P PRINCE 9A X
BAR P LOUISA 10C X

Consignor: Horseshoe Creek Farms Ltd. - Weyburn, SK

Open and ready to be flushed following the sale. We guarantee a minimum of 6 grade I embryos

Lady Louisa is the only flush mate born to HC FL Touchdown 123T ET X, the 2009 Canadian National Champion Bull, and wow, did this mating ever work well. Touchdown is being marketed in Canada, USA and Australia and Lady Louisa is becoming one of our favourite females and is just starting her career as a donor female here. She is moderate framed and has a picture perfect udder. Her first calf is being shown in the US this year. She has a massive body and they just don't come any easier fleshing. She will be on display and will go directly to Davis-Rairdan Embryo Transplants Ltd, Crossfield, AB following the sale to be flushed. This female is capable of producing some great ones!

If the buyer wishes, Horseshoe Creek Farms would be pleased to share equally in two flushes in this female. Contact them for more details. As a bonus, they will offer semen for this flush, from any of their herdsires if the buyer wishes at no additional cost.

Lot 50 Flush Dam - HC Lady Louisa 12T

4 Grade 1 Embryos
SASKVALLEY PIONEER 126P
X SIX S LEAH 55L

Consignor: Horseshoe Creek Farms Ltd. - Weyburn, SK

These calves resulting from these embryos will be full sibs to HC Bulletproof 39X who topped the 2011 Sun Country Bull Sale at \$6900 to Rocking L Cattle Co., Wawota, SK and to HC Lady Leah 5X who was the top selling heifer at \$4100, in the 2010 Sun Country Female Sale to the Obrecht family, Harlan, IA. Six S Leah 55L is truly an amazing donor, and she has now produced close to 300 embryos which have sold to 5 countries. She has a massive body and is extremely easy fleshing. She works extremely well with Pioneer. Pioneer continues to prove that he is a major league sire, and his calves are always in the top end of our calf crop. Alexanders guarantee you will get a minimum of 2 pregnancies at 70 days providing an experienced embryo technician is used.

CROOKED POST RED ROSE 11P X-13601

CP BOSTON BODACIOUS 12H X
DOWNSVIEW RED ROSE 13E

Consignor: Crooked Post Shorthorns - Rocky Mtn. House, AB

This embryo pregnancy will yield a full sibling calf to Crooked Post Grissom 24T and Crooked Post Arbutus 21W. Much more can be learned about this genetic combination by going to www.crookedpost.ca. Red Rose 11P is a highly productive, easy fleshing, heavily muscled, big volume cow. She has the ability to maintain flesh better than most, she looks good year round regardless if there is a 900 lbs. bull calf beside her in the fall. She raised a dynamite heifer in 2008 that was purchased by Hargrave Shorthorns in Manitoba and she may be their best female. Byland Gold Spear is a trait leader for calving ease, milk and maternal traits. Crooked Post Grissom 24T is currently a trait leader in calving ease, weaning weight, yearling weight, milk, and total maternal. These trait predictors and breeding characteristics are bred in and will carry on with high potency. The recipient dam is a reliable Shorthorn/Red Angus, bred and raised here at Crooked Post. Embryo implanted May 30, 2011 for an early March calf.

Crooked Post Grissom 24T

Full Sibling to Lot 53 Embryos

4 Grade 1 Embryos
SASKVALLEY RAMROD 155R
X SBR DORA 228

Consignor: Horseshoe Creek Farms Ltd. - Weyburn, SK

Ramrod is the senior herdsire at Saskvalley and Paintearth, and he has proven to be a great sire of both sexes. We thought he was a natural choice to flush our Dora donor to, and we are pleased to offer some of the resulting embryos in this sale. SBR Dora 228, was bred in the good Stangl herd in South Dakota and was the leading donor at Cagwin Farms, Virginia, IL for several years. When the opportunity to purchase her arose, we jumped at the chance to purchase her. She has tremendous depth of body and overall capacity, yet is moderate framed. She has an excellent udder and has a proven track record as being an outstanding producer. This flush was very successful and we have already sold embryos to England, Scotland and two US states from it. The resulting calves will be solid red, and will also be very good! Again, the Alexanders offer their minimum guarantee of a minimum of 2 pregnancies at 70 days (minimum 50% pregnancy rate) if an experienced embryo technician is used.
