# Twin Bridge Farms Ltd. & Guests *Gelbvieh* BULL & FEMALE SALE

*Welcome* to the second installment of the Twin Bridge Farms & Guests Bull Sale. We are glad to have Jen-Ty Gelbvieh and the Ness family back again this year. All three programs are very passionate about the Gelbvieh breed and strive to produce the best possible genetics they can.

The beef industry is in a great place and with the national cow herd so low in numbers it is sure to continue. Top end feeder calves and replacement females were at a premium last fall. Now more than ever it is important to have the best possible genetics in our cow herds. On March 18th there will be bulls on offer that will make your operation competitive in every step of beef production. There are performance bulls to raise those scale busters in the fall, low birth weight bulls to make calving season stress free and all of them should sire those great females the Gelbvieh breed is known for.

New this year is a group of heifer calves right from the heart of the replacement pens of Twin Bridge Farms and the Ness herd. These females should compliment the bulls on offer and go onto be great producers.

All bulls selling will be semen tested and vet checked. The sellers are willing to keep purchases until April 15th free of charge and deliver them at least 200 miles free of charge. If you take your bull(s) home on sale day you will receive a \$50 discount per bull.

If you have any questions on the sale lots or would like to view them before the sale feel free to contact any of us. Bulls and females can also be viewed starting Sunday afternoon at the Silver Sage. Please join us for pre-sale lunch and refreshments and socializing after the sale. We will also be drawing a name to win a limited edition 40th Anniversary Gelbvieh Belt Buckle.

We look forward to being your hosts on March 18th.

Welcome to Twin Bridge Farms and Guests 2nd Annual Gelbvieh Bull Sale. The Birch family has been in the cattle industry for years in the Lomond area. Farming is their livelihood, they love their strong connection to agriculture Every year they continue to add top quality females building a solid foundation herd. They have also purchased and used top end Gelbvieh herdsires to advance their program.

Also, selling are Jen-Ty Gelbvieh and Keriness Cattle Company. Don and Lorna Okell, Jen-Ty Gelbvieh, have maintained and selected for a strong and maternal cow herd. The results have been evident in their successful program. Keriness Cattle Company, Kert and Joe Ness, also have been developing a good purebred Gelbvieh and with the addition of their new herdsires that all cattlemen will be pleased with the results.

The bulls from these three breeding programs are stout, thick, good haired individuals that will add calving ease, performance and maternal traits into your cow herd. Gelbvieh cross cattle are in demand in the markets throughout North America. These genetics will increase your bottom dollar and add to your profitability.

If you have any questions please contact Ron, Aaron, Don, Kert, Joe or myself. If you are interested in purchasing individuals but are unable to attend the sale on March 18th please contact Don Savage Auctions and your order will be handled in a professional manner.

Yours truly,  
Don Savage

Once again we are excited to offer a great selection of yearling bulls. We are committed to give our buyers combined forces of quality and genetics, backed by an excellent cowherd.

All our bulls are moderate, thick-made with great dispositions. We hand feed them so they are very quiet, (you can scratch everyone of them in the pen). They are on about 13 lbs of bull ration and free choice of hay. All our bulls are treated with Cattle Master 4+VL5, Ultra Choice 8-Way and Ivomec.

We would like to thank all our buyers that weathered the storm last year to come out and support our sale.

For any questions about Jen-Ty's bulls, or to view the bulls and cow herd please give us a call. We appreciate the confidence and trust many of you have given our program over the many years and look forward to seeing you on sale day.

Don & Lorna Okell

DEG Trent 480T

AWB Birch's Max 64X

## Jen-Ty Reference Sires

### DEG TRENT 480T

We purchased Trent as a calf beside his mother LC Wandering Petunia 480P from Double Eagle Gelbvieh in 2007 we knew soon as we seen him that he would be the next herdsire in the Jen-Ty operation. He showed even as a calf great thickness and muscle structure. He grew up and didn't disappoint us. All his calf crops show all the same traits. He always put pounds on every calf crop. This is the last chance to get a Trent bull calf, as we had to put him down last year which was very disappointing for us.

### AWB BIRCH'S MAX 64X

We purchased Max as a yearling from Birch's he is a dark red bull very structurally sound, polled, large testicle and seems to work well.

### DVE DAVIDSON MR. JAY 61X

We purchased Mr. Jay from the Davidson ranch. He is a very thick soggy bull. We used him just on our heifers and he did what he was suppose to easy calving, never had any issues using him on heifers.

## 1

*We are very pleased to be a part of the Birch Family's 2nd Bull Sale. We really enjoy the Gelbvieh breed and the friendliness of all the people that we have met over the last 16 years.*

*We have a 50 head cow herd of Gelbvieh purebred females that are owned by us individual. Our common interest is raising good stout Gelbvieh cattle. The Ness guys make their rounds at the shows and sales and enjoy talking with old friends and making new ones.*

*We are offering 6 top quality herd bull prospects and 3 replacement females that will make great brood cows. Looking forward to visiting with you at Brooks.*

We are very excited to once again be offering a great set of Gelbvieh bulls. The bulls this year have surpassed our expectations and are easily the best group we have produced.

Over the past years we have selected females and sires that meet our high standards for performance, calving ease, maternal traits and conformation. Through an extensive AI program and more recently an ET program we have been able to take advantage of the best Gelbvieh genetics in North America. We base our breeding program around the commercial cattle industry. We strive to produce bulls that meet the demands of every step in the beef industry.

The bulls are developed in a 5acre area to give them lots of room and keep them fresh for breeding. They are hand fed a low starch ration and free choice hay. Both the bulls and female have been on a full herd health program. We fully guarantee each bull for the first year. Check out our website [www.tbfarms.ca](http://www.tbfarms.ca) for more information and pedigree pictures on our sale lots. Videos of the bulls can also be found through the website or by going to [www.youtube.com/TBFarmsGelbvieh](http://www.youtube.com/TBFarmsGelbvieh).

If you have any questions or would like to view the bulls and their dams before the sale don't hesitate to contact us. We look forward to seeing you all sale day. With any luck the weather will be a lot nicer to travel in this year.

Target is a thick, long moderate made bull that is as dark red as you can get. The combination of Tiree and Megalith has worked very well for us and has produced some standouts like our herdsire Ricco. His dam is an eye catching female that has a ton of volume and mass but doesn't stand too far off the ground. If you are looking for a sire to produce replacement heifers Target comes highly recommended.

YW ADG: 4.05 lbs.

These three ET brothers are from a standout female in our program. 45U is the type of female we strive to produce; deep, thick, easy fleshing and brings in the good ones every year. We selected the maternal Totally Exposed to flush her to, producing progeny that have a nice balance of performance and maternal traits. 45Z is the more moderate framed of the brothers and should produce most similar to his sire. 52Z is the powerhouse of the trio. He has a ton of length, thickness and is smooth made while being one of the high gainers in the pen, making him a real herdsire prospect. 49Z would have been very similar to 52Z but unfortunately was on a poorer cow, which is reflected in his weaning weight. He has done a lot of catching up since weaning however.

Powerful and eye appealing best describe Over Exposed. He is the beefy structurally correct type of bull we strive to raise. This is the type of bull that should produce those growthy feeder calves that feedlots are looking for. On top of that if his daughters are anything like his Spiderman sired dam they should make great brood cows. YW ADG: 3.56 lbs.

You can tell when looking at this calf why we have used Exposure so much in our program. They are the type of cattle we find fit perfectly in the feedlot and make real broody females. 28Z comes from a no miss female that has produced some nice females for us including one of our consignments in the 2012 Wish List Sale that sold to Hardy Letain.

Here is a soggy thick made bull that won't disappoint. This bull will sire those sought after buckskin calves with none of the usual trouble. The Exposure calves we have fed out have really excelled in the feedlot and Post Time's will too. His grandam was one of the original five females that we purchased that sold us on the Gelbvieh breed.

Another Exposure son that is thick and soggy. It might sound repetitive but that's because these brothers are so similar. Exposure continues to sire progeny that are uniform which is one of the most underappreciated traits in the beef industry. Calf buyers pay premiums when they can buy large groups of uniform calves. If these brothers are like their sire, they will produce uniform calves as well.

Vision is the type of bull that drew us to the Gelbvieh breed. Moderate birth weight and smooth fronted with the thickness and depth of body that is hard to find. The whole package. He is most likely the best Exposure son we have produced. This is no surprise since his pedigree has four of the most influential herdsires in our program and the Anny cow family. His full sister is one of our top first calf heifers this year.

Starting Gun was the highlight of our show string last fall. He is the type that really draws your attention with his combination of eye appeal, length and muscle structure. He has the stretch from birth to weaning weight that will make his progeny trouble free and profitable regardless if he used on heifers or mature cows. His dam is a tank that has a ton of volume, thickness and fleshing ability. This herdsire prospect is homozygous polled and homozygous black.

97	739	1201	3 .32	3.5 .34	72 .31	96 .30	27 .25	64	5 .26

Sure Shot is a really well balanced herdsire prospect. Just check out his EPDs. He comes from two individuals that have really worked well for us. The Beretta calves highlighted our show string last fall. We have selected a son to use in our program and we sold a choice of his daughters in the Wish List Sale for \$4500. Sure Shot's stylish dam has yet to disappoint us since she was purchased from the Drader Dispersal. She has sons working for both the Lucas and Hones families.

Rock Solid is a meat machine. He is going to add a ton of performance and thickness to his progeny. The few calves we have had from Red Rock have all really performed well without sacrificing soundness and fleshing ability. His dam has never disappointed us and her fullblood pedigree will contribute some added hybrid vigor to Rock Solid's calves.

96	586	832	4 .32	4.8 .36	69 .30	81 I+	20 .24	55	3 .24

We had no Rally Lou bulls this year and it didn't seem right to not have at least one of his offspring in the sale so we decided to part with 74Z. Rally Lou has had a very significant impact on our program. His sons were always at the top of our bull pen and his daughters have turned into very productive females. We only get Rally progeny from AI mating now so this may be the last chance to buy a direct daughter.

Dallas just like the Exposure sons has a ton of volume and thickness. Her weaning weight was at the top of the heifer pen but she will mature into a nice framed cow. She should become the type of female that the Gelbvieh breed is known for. With Rally Lou as her grand sire you also know that she should produce high performing sons. We have always wanted to retain our Exposure daughters and they have become the type of females that work in our short grass country.

## BULL BREEDING GUARANTEE

*Thanks*  
to all buyers  
& bidders

All guarantees are between the buyer and the seller.

All bulls offered and sold, except calves at side, are guaranteed breeders irrespective of age. All bulls after reaching the age of 15 months must be capable of settling 7 head or 75% of the eligible normal healthy breeding age females he is running with for a 90 day period, whichever is the lesser. No guarantee regarding the freezing ability of a bull's semen is made or implied in the sale of a bull unless covered specifically in a written contract.

In the case of a complaint regarding a bull's breeding guarantee the buyer wishes to enforce the provisions of the Code shall report the same in writing to the seller enclosing a report prepared by a licensed veterinarian within 6 months of purchase or the time the bull reaches the age of 15 months whichever occurs later. The bull shall be returned to the seller at the buyer's expense. The seller may replace the bull with a bull of equal quality or refund the purchaser's price of the bull or he may attempt to prove the bull a breeder under the terms of this clause within 6 months. If the bull is proven to be a breeder within the 6 months provided he shall be returned by the seller to the buyer and the buyer's expense. If he is not proven to be a breeder then replacement or, at the option of a seller, a refund is mandatory. Under no circumstances will a seller be liable for more than the purchase price of the animal sold.
