BULL & FEMALE SALE

Canada's Only Leptin Tested Gelbvieh Bull Sale

Monday
MARCH 16
2015 at 1 PM

Silver Sage Community Corral - Brooks, Alberta

Twin Bridge Farms Ltd. & Guests *Gelbvieh* BULL & FEMALE SALE

Welcome to the 4th Annual Twin Bridge Farms and Guests Bull and Female Sale. We are happy to have both the Ness and Carlson families back again and are excited to welcome the Litchfield's to the sale this year. All four operations are dedicated to producing the best Gelbvieh genetics.

Wow! What a year 2014 was for the beef industry. We saw record prices that many never thought possible. There were many happy cattlemen last fall. With the national cow herd at all time lows, and no indication of its increasing, we can hope to see these high prices for years to come. It is more important now than ever to be using the best genetics possible and keeping a youthful herd sire battery. Each extra pound we can raise and every cow that is in calf makes a bigger difference on our bottom line.

On March 16th the bulls on offer have those genetics that will progress your operation. There are performance bulls to raise those scale busters in the fall, low birth weight bulls to make calving season stress free and of course all of them should produce the females the Gelbvieh breed is known for. Back by popular demand there will be a select offering of yearling females for your appraisal. They meet the same high standards as the bulls.

Many of the cattle will again be Leptin tested. The Leptin gene causes cattle to produce Leptin, which is associated with appetite. This increase in appetite in turn increases weight gain, carcass grade, milk production, fleshing ability and ultimately profit. Cattle can have no copies of the gene (CC or 0% positive), one copy (CT or 50% positive), or two copies (TT or 100% positive). With each additional copy of the gene the traits above will increase in comparison to animals that are genetically similar otherwise.

All cattle selling will be vet checked and the bulls will be semen tested. Sellers are willing to keep purchases until April 15 and deliver them within 200 miles free of charge. Please make arrangements with the sellers if you would like purchases kept later or delivered farther so we can work with you as best we can.

Please join us on March 16th and let us be your hosts. Come early for lunch and stay after for refreshments and socializing. If you are unable to attend the sale contact myself, Don Savage, Loren Unger, Grant Ellefson, Ron Birch, Joe Ness, Lon Carlson or Linden Litchfield and we will be sure to take care of you.

Welcome to the 4th Annual Twin Bridge Farms and Guests Bull and Female Sale.

What a difference a year makes in the cattle industry! Calves are selling at record prices; cull cows and bulls are at their highest price ever and replacement females have set a new standard. Those of us who have remained in the cattle industry are serious about the future of our business. Using the best available genetics will help you realize the best results while building on an already solid foundation.

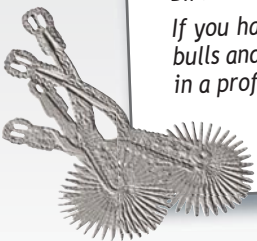

Twin Bridge Farms has always sought out the top end herd sires and replacement females to build their breeding program. They had a terrific year in 2014 with outstanding shows at both FarmFair and Agribition with high selling females at Gelbvieh events. They continue to improve and expand their herd into one of the leading seedstock programs in the breed.

The guest consignors are Keriness Cattle Company - Airdrie, AB; Carlson Cattle Company - Magrath, AB and joined this year by Linden and Randee Litchfield - Cardston, AB. You will appreciate the growth and performance within this offering from all consignors.

The bulls from these four programs are stout, thick, good haired prospect that will add calving ease, performance and maternal traits into your cow herd. There is also a select group of open yearling purebred heifers that will represent the Birch and Ness breeding programs very well.

If you have any questions about the cattle please contact the consignors or myself. If you are interested in purchasing bulls and females on March 16th, but are unable to be with us sale day, please contact me and your order will be handled in a professional manner.

Yours truly,
Don Savage

First off, we would like to thank all our customers from last year's bull sale as well as the fall female sales. Your confidence in our program encourages us to produce a continually improving product. Once again, we are very excited to offer a set of Gelbvieh bulls and heifers we are very proud of and are confident they will meet your expectations as well.

For over a decade we have selected Gelbvieh females and sires that meet our high standards of performance, calving ease, maternal traits, soundness and conformation. We have no use for poor udders, bad temperaments, decreased fertility or low vigor calves. Through an extensive AI and ET program we have been able to take advantage of the best Gelbvieh genetics in North America. We base our breeding program around the commercial cattle industry. We strive to produce cattle that meet the demands at every step in the beef industry.

We develop our bulls in a 5-acre area giving them lots of room to stay athletic for breeding. They are hand fed a low starch ration and free choice hay to promote soundness and longevity. All our sale cattle are on a full herd health program and are DNA parent verified. Check out our website www.tbfarms.ca for more information, pedigree pictures and videos of the sale lots.

If you have any questions or would like to view the bulls and their dams before the sale, don't hesitate to contact us. We look forward to being your hosts.

Backfire has as much bone, muscle and natural growth as you will find in any black Gelbvieh bull. This good haired bull was our highest gaining bull on test. We teamed up with Carroll Creek Cattle Company to purchase his structurally flawless dam from the Unger dispersal and she was part of our showstring in 2013. Her heifer calf that was shown alongside her sold in the Agribition sale to RPS Gelbvieh. He is a twin but was raised as a single. Homozygous polled and black. 100% Leptin positive.

This bull was named right as he has Big Time potential to make an impact on someone's program. He has great calving ease with only a 75lb birth weight but doesn't give up performance. His young dam is already a standout in our black program with a great udder and an easy fleshing ability. Big Time is sure to make females just like her. Heifer Recommended. Heterozygous black. 50% Leptin positive.

Have a look at the great set of EPDs and you'll see that Blackout is a balanced trait bull that could work in a wide range of operations. His dam is arguably the most consistent producing cow in our program. To date she has produced five sons, including one in each bull sale. They have gone to work for Honeco Farms, Brian Yasieniuk and two to Roy and Gaye Lucas. This cow's only fault is that she is yet to leave us with a daughter to carry on her prolific genetics in our program. Blackout is heifer recommended Homozygous polled, heterozygous black and 100% Leptin positive.

Dam of Lot 3

Sons of

**FRL FIR BIG RIVER
BIG'N'RICH 438Y**

We were very fortunate to have been able to use Fir River Big'N'Rich 438Y in our program through AI. He was the high selling bull in the Saskatoon Gelbvieh Bull Sale and comes from some of the best genetics in the Gelbvieh breed. His sire is a former Denver Bull Futurity Champion and his dam is a donor at Fir River Livestock. Many will recognize her as the dam of the record high selling \$30,000 FRL FIR RIVER ZAHARA 5U. With genetics like these backing him, it is understandable why he has worked so well for us. His calves are moderate at birth and perform well afterward. His sons will leave your wallet Big N Rich!

Lot 1

Lot 2

Lot 3

Sons of

V V YOICKS 107Y

Yoicks has had a very large impact on our program in the last couple years. He consistently increases performance, length, thickness, scrotal and hair in his progeny without sacrificing maternal traits. Both his sons and daughters have surpassed our expectations. His first set of sons was our highest selling sire group last year. His progeny also made a splash last fall. SA BIRCH'S REVOLVER 3B, who was Champion Gelbvieh Bull in the Legends of The Fall at Farmfair and Reserve Senior Bull Calf at Agribition, is being retained in our herd to replace his sire. A daughter, AWB BIRCH'S RAINBOW 113A, was voted Gelbvieh Sweetheart Classic Champion by our fellow breeders and sold as the first lot in the National sale to Joe Ness. This will be the last large offering of Yoicks sons as we lost the use of him to an injury and now only have calves from him through AI.

| 80 | 608 | 1135 | 8.29 | 1.1.33 | 66.29 | 106.27 | 30.19 | 62 | 8.20 |

Ironclad is the full brother to the 2014 Gelbvieh Sweetheart Champion, AWB BIRCH'S RAINBOW 113A. This also makes him a maternal brother to AWB BIRCH'S IRON MAN 35X who sold to Nelson Gelbvieh and sired Duane's highest selling sire group with his first set of sons. Another maternal sibling is the dam of lot 28 selling in this sale. Ironclad is the most moderate of the Yoicks sons selling this year but could very well make the best females. 50% Leptin positive.

Here is a herdsire prospect that is going to have a lot of friends on sale day. He is most similar to his brother, Revolver 3B, that we are retaining. He has the same thickness, length, volume, hair and great disposition. They were also both part of our pen of three bulls at the Medicine Hat Pen Show. His eye-catching dam was part of our show string as a calf and bred heifer and has turned into a great production oriented female. This young female has a daughter working in our herd and a son sold to WL Farms in our 2013 sale. Homozygous polled and 50% Leptin positive.

Steamroller is one of the power bulls in the pen. He's got that thickness, volume and length that any producer can appreciate. Although he has more birth weight than others, he is built to calve easy with his exceptionally long side so you can sleep easy calving him to cows and smile when you sell his scale busting calves. His productive dam has been recognized as a Dam of Merit and his grandam a Dam of Distinction. His brother, SA BIRCH'S BULLDOZER 81A was a feature and high seller in last year's sale to Towerview Ranch. A sister sold in a past Wish List sale to Davidson Gelbvieh and others are producing in our program. 100% Leptin positive.

Marion 45U did it again! Sherriff's high producing donor dam never disappoints, which is why we are planning on flushing her again in 2015. His unmatched performance EPDs are proof of what this bull can do. When you combine an extended, easy calving structure with high performance you make the perfect commercial man's bull. When that package is backed by a great cow and tons of eye appeal you have a bull that can do a lot in any program. Brothers have sold to the Bertschy family, Circle T Gelbvieh and Hawkeye Ranch. A sister's son sells as lot 29. Homozygous polled and 50% Leptin positive.

Dam of Lot 8

Lot 8

Bulls can be kept until April 15th

Sons of

OWEN BIRCH'S RICCO 154W

Ricco was raised by Owen and, typical of his luck, was a standout from birth. We were not surprised when his first sons rose to the top of the bull pen. What we were not expecting was that he was a sire that could leave so much performance in his sons and yet give us such incredible daughters. They have a perfect frame size, great udders, tons of volume and natural fleshing ability. Ricco's sons will sire growthy feeder calves as well as very productive females, just like him.

Recoil is a structurally correct bull that is ready to cover some miles on our big southern Alberta pastures. His dam comes from the Beryl cow family that has really started to prove their worth. The last couple years, everything from this family has made it to the keep pen, whether it be the bulls or the females. A brother to Recoil sold last year to Dar-Lin Ranching. 100% Leptin positive.

Lot 14

Sons of

VV TIREE 150T

Tiree has been a big part of our breeding program for the last number of years. He has very balanced traits, being in the top 40% of the breed or better in all his EPDs. We could go on and on about his progeny but will let his sons and grandsons in the sale do the talking for us. We have very limited semen left on Tiree so there will be few of his progeny for sale in the future.

Cage Match is a good haired, eye catching bull from a great cow family. His two-year old dam did a great job with him and has the potential to be one of our top females in the future. She is following in the footsteps of her matriarch dam who was a Dam of Distinction. Cage Match shows the same balanced traits as his sire. 100% Leptin positive.

Here he is, the Farmfair Reserve Champion Bull Calf! Timber has been a favourite here all year! He is tremendously long sided, has a remarkable disposition, and is royally bred. His dam is Gail's 4-H heifer and with Timber by her side, they were Vulcan 4-H Grand Champion Female, Farmfair Res. Senior Champion Female and Agribition Champion Junior Cow/Calf Pair. She is a model female in every sense and she will be a big part of our program in the future. Timber has the potential to be a big part of someone's breeding program, especially if he leaves females anything like his dam, which we believe he will. 100% Leptin positive.

Flashback is a very special individual. He is an embryo transfer from the fourth Gelbvieh bull to ever be imported to Canada and our matriarch Dam of Distinction donor, Gayle 32N. This flush has far exceeded our expectations. A flush sister, Gayle 19B, was part of our show string and placed 2nd in class at Farmfair and 3rd at Agribition. Impressive for 40 plus year old genetics! Two more sisters are also in our replacement pen. Flashback himself has a ton of volume, thickness and those balanced traits that we find so important. He has plenty to offer either the seedstock producer or commercial cattlemen. To our knowledge, he is the only fullblood Gelbvieh bull for sale in Canada this year, and he is polled! Note that due to his older pedigree his EPDs are outdated so do not represent his potential. 50% Leptin positive. Retaining 50% semen interest.

Bootlegger is another outcross bull from a fullblood pedigree. Fullblood status was not kept up in his pedigree however, so he is registered as a purebred. He is from a very consistent producing female who has daughters working in our herd and a son that sold to Rick and Bryce Strate. Her dam was one of the original 5 Gelbvieh females we purchased from Carlson's. We used her sire, Kevin, as our heifer bull for many years and he left us with highly productive females that last. Heifer recommended.

If you are looking for a heifer to build a cow family around then take a look at Audrey 133B. We strongly considered keeping this female to represent our program in one of the female sales next fall. She combines the strong maternal traits of her grandsire Spiderman and the performance of Yoicks. Her dam is a smaller framed female that continues to out produce herself. Her son sold last year to Red Coat Gelbvieh.

Lot 35

CARLSON CATTLE COMPANY

Lon T Carlson & Lorraine Beaudin
Box 86, Magrath, AB TOK 1J0
Phone: 403/894-3413

2014 has been an interesting year to say the least. With the highest cattle prices in 12 years, ranchers are finally being paid for their resilience and looking forward to 2015 and beyond.

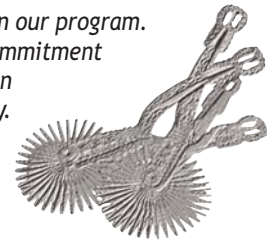

Lon and Lorraine would once again like to welcome all their purebred and commercial buyers to join us at this year's joint sale with Twin Bridge at the Silver Sage Community Corral in Brooks, Alberta.

Due to the unusually high number of heifer calf births in our purebred herd last spring, we are very pleased to be offering 6 performance tested purebred bulls in this year's sale. These top performing bulls are the cream of the crop.

Our program continues to advance and we want to thank the 2014 buyers who put their trust in our program. We believe in helping shape the future of the livestock industry by showing an unprecedented commitment to genetic improvement. Our family is very excited about the future of the Gelbvieh breed in North America and we look forward to the challenges and rewards that are part of that journey.

Be sure to join us for a beverage and a meal before the sale.

See you there,
Lon Carlson and Lorraine Beaudin and family

When I was offered the chance to sell some bulls with the Birch family this year I didn't hesitate and jumped at the chance. I figure anytime you're able to do business with good people you better!

My wife, Randee and I, decided in the fall of 2013 we better buy some bred cows. Well with Randee's Dad being Albert Carlson, it had to be Gelbvieh! So we bought 6 head from V&V's dispersal sale, and then purchased 13 registered cows from Wade and Lorna Williams of Hanna, Alberta. We're excited to bring 4 of our bulls to Twin Bridge Farms Bull Sale.

Middle of the road is a good way to describe the bulls we are bringing to sale, moderate birth weights, good weaning weights, moderate frame scores and good temperament. All of these bulls are at Cattleland Feedyards Bull Test Station being tested for Residual Feed Intake, rate of gain, each bull will have yearling weights, ultrasound data and BSE information available on sale day.

We look forward to seeing you at Brooks on March 16. If you have any questions or want to come look at the bulls feel free to give us a call, I'll be more than happy to show you the bulls.

Kloee's 20B is the bull calf I have been watching all year. He is dark red, thick, and deep. He has hair, good feet and an excellent temperament. His mother is my favorite cow, she has all the good qualities a Gelbvieh cow should have, good feet, disposition, excellent udder, milks good, moderate frame score and easy to handle. This bull will definitely moderate frame scores on replacement heifers without having to sacrifice depth or thickness. On test December to January he gain 3.32 lbs a day, just waiting to finish the test and see his feed:gain ratio, and the ultrasound data. Retaining 1/3 semen interest.

We are very pleased to again be a part of the 4th Annual Twin Bridge and Guests Bull & Female Sale. We enjoy our Gelbvieh cattle and the many great people in the breed that we can call friends.

We calve 60 purebred Gelbvieh females every spring and are pleased with the progress that our females have made with the new herd sires that we have added into our herd. We love to raise stout, thick, quiet cattle that will be appreciated by their new owners.

We are offering 7 top quality herd bull prospects and replacement heifers that are from the top end of our excellent yearling heifer pen.

We are looking forward to seeing you in Brooks again this year.

BULL BREEDING GUARANTEE

All guarantees are between the buyer and the seller.

All bulls offered and sold, except calves at side, are guaranteed breeders irrespective of age. All bulls after reaching the age of 15 months must be capable of settling 7 head or 75% of the eligible normal healthy breeding age females he is running with for a 90 day period, whichever is the lesser.

No guarantee regarding the freezing ability of a bull's semen is made or implied in the sale of a bull unless covered specifically in a written contract.

In the case of a complaint regarding a bull's breeding guarantee the buyer wishes to enforce the provisions of the Code shall report the same in writing to the seller enclosing a report prepared by a licensed veterinarian within 6 months of purchase or the time the bull reaches the age of 15 months whichever occurs later. The bull shall be returned to the seller at the buyer's expense. The seller may replace the bull with a bull of equal quality or refund the purchaser's price of the bull or he may attempt to prove the bull a breeder under the terms of this clause within 6 months. If the bull is proven to be a breeder within the 6 months provided he shall be returned by the seller to the buyer and the buyer's expense. If he is not proven to be a breeder then replacement or, at the option of a seller, a refund is mandatory. Under no circumstances will a seller be liable for more than the purchase price of the animal sold.
